

Bob,

Thank you for serving as Coach and Catalyst these past 3 years through The Master's Program. Truly, our quarterly sessions served as strategic "huddles" that held me accountable to my good intentions in the following ways:

1. Our sessions provided consistent time and space in my life to pause and audit my current reality; motivating me to make the mid-flight adjustments that moved me toward greater health and wholeness.
2. TMP connected me with Kingdom Warriors that sharpened me and will make the journey forward one with quality relationships and deeper significance.
3. Our meetings fueled an on-going growth and development plan that inspired me-body, mind, soul and spirit. I am a healthier and more focused leader as a result of The Masters Program.

Lastly, the two greatest gifts that you and TMP have provided for me have been the Life Mastery System and the Dream Master Curriculum. These two tools have been instrumental and timely in helping me to evaluate my current reality and have motivated me to chart dreams for my marriage and family that I would have otherwise under-delivered on. The intentionality with which I lead my family and myself are a direct result of these tools. For example: In our marriage, we have a greater spirit of unity, refueling friendships, increased personal fitness and we play more. As a family, we have consistently served in Mexico, built homes together and my oldest son and I served in Africa for two weeks as part of a rites of passage journey we created. Additionally, we spent a sabbatical month in Kauai as a family, creating memories I will forever cherish. These dreams and more were envisioned through the Dream Master process. I have always been driven in the professional and Kingdom realms because that's what people "see". TMP helped me to bring greater balance and wholeness to my life by challenging me to be more intentional about the personal and family realms. I am a more complete person, a better leader, husband and dad as a result! Thank you!
